

AKUBRA SIZE GUIDE

MEASURING YOUR HEAD SIZE

Heads come in all sizes, and in a surprising variety of shapes.

Although Akubra hats are adaptable, and will usually conform to differences in shape with a little wearing, it is essential that the size be correct for your head.

TO DETERMINE YOUR HAT SIZE FOLLOW THESE 3 SIMPLE STEPS:

- Measure the circumference around your head - approximately 12mm (1/2") above the ears
- Keep the dressmaker tape level and firm, across the temple and above the eyebrow ridges.
- Check the size chart given below.

NOTE: For in-between measurements use the next size up.

AKUBRA CM:	53	54	55	56	57	58	59	60	61	62	63
Equivalent	XS		S		M		L		XL		XXL
U.K. hat:	6 1/2	6 5/8	6 3/4	6 7/8	7	7 1/8	7 1/4	7 3/8	7 1/2	7 5/8	7 3/4
U.S. hat:	6 5/8	6 3/4	6 7/8	7	7 1/8	7 1/4	7 3/8	7 1/2	7 5/8	7 3/4	7 7/8

For an enduring fit with your new Akubra the following points should be considered:

- The Sheepskin inner band of the hat may shrink slightly with use. Do not expect a tight-fitting hat to 'loosen up'
- In time, the hat will conform to your head shape. Initially, a slightly loose-fitting hat can be adjusted using folded tissue placed behind the inner band, then removed as the hat conforms to your head shape.
